RAJASTHAN   HACKATHON

On the Occation of IT-Day Celebration

To Have A New Revolution

Platform Applied – e-Mitra

Presenting an Idea

An "IDEA"

- Gaurav Agarwal

IDEA

?   **?**

o The one who thinks how to implement an Idea.

o One who think to get an Idea to start a business.

THEN WHO SUCCEED?

o The One who have an unique Idea and ability to work on it

  Eg An Android developer have came up with Idea of useful
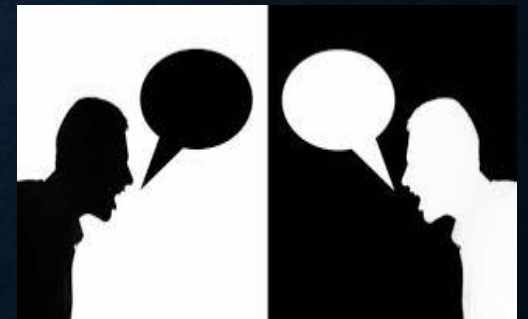

App

Or

o The One who have ability(eg money , Technology knowledge)

  and guts to implement an Idea which is of other Brain

     The one or a team who implement wins and known

      to be "ENTERPRENEUR" or "ENTERPRENEURS"

PROBLEM

o Not to Share an Idea with Anyone ,what I have to do

Live Your Own life(Fear of stealing ,Lack of Trust)

o Fear of dying with jealousy , No recognition of

Yours in spite its your Idea which brought the change

As we Know 90% of Population is selfish(leaving 10% approximately)

"Stopping A overall Change"

SOLUTION

❖ The Solution is to build a Secure System ,Secure and Trustworthy

   Connections , We need a platform where

- unique Idea

- Idea person(who have an idea)

- Designer

- Developer (or a team of developers)

- And Many other(who contributed)

   Have recognition in History and be rewarded for their work

   whose efforts brought the change in making life of an Individual simpler.

   "Aheading Towards Overall Change"

TIPS FOR IMPLEMENTATION

➢ Human Participation for collecting Ideas from Rural areas or from the people who do not have access to technologies.

For this (either we can make learn technology to an individual or have a separate Idea box similar to postbox)

➢ Having a database and search engine where unique Idea & people related to it can be recognized .

MOTTO OR OBJECTIVE

BRING IN CONNECTIONS

CHANGE IN INDIA

similar to ''Make In India''

(Can be extended to world)

STAND ALONE TO STAND APART

THANK YOU
